

About Program

ANGULAR:

Angular is a popular front-end framework for building complex and scalable web applications. It was developed by Google and is widely used by developers across the globe.

Angular course will provide learners with a comprehensive understanding of the framework and the skills to build complex and scalable web applications.

Introduction to Angular

- This section will provide an overview of Angular, its features, and advantages.

Setting up the environment

- This section will guide learners on how to set up the development environment for Angular.

TypeScript

- TypeScript is a superset of JavaScript used in Angular. This section will cover the basics of TypeScript and how to use it in Angular.

Components

- Components are the building blocks of an Angular application. This section will cover the basics of creating and using components in Angular.

Directives

- Directives are used to manipulate the DOM in an Angular application. This section will cover how to use directives in Angular.

Services

- Services are used to share data between components in an Angular application. This section will cover how to use services in Angular.

Dependency Injection

- Dependency injection is a design pattern used in Angular. This section will cover how to use dependency injection in Angular.

Routing

- Routing is an essential part of any web application. This section will cover how to use routing in Angular.

Forms

- Forms are an essential part of any web application. This section will cover how to create forms in Angular.

Pipes

- Pipes are used to format data in an Angular application. This section will cover how to use pipes in Angular.

Observable

- Observables are used to handle asynchronous operations in an Angular application. This section will cover how to use observables in Angular.

HTTP

- HTTP is used to make API calls in an Angular application. This section will cover how to use HTTP in Angular.

Deployment

- This section will cover how to deploy an Angular application on a server

About Techehost

Techehost is designed to provide high-quality, flexible and accessible learning opportunities to help you develop the skills you need to advance your career or pursue your personal interests. We offer a range of courses, taught by industry experts, that cover a wide variety of topics and are designed to fit your schedule and learning style. Our online learning environment is user-friendly and allows you to interact with instructors and other learners in real-time, enabling you to get the support you need to succeed.

Whether you're looking to learn a new skill, enhance your knowledge or take your career to the next level, our online training website is the perfect place to Start.
